How Logikcull Saved \$178k on Audio/Video Review in Just 10 Minutes

Tasked with reviewing nearly 15,000 voicemail records prior to production, the company's legal department estimated the project would require nearly 600 hours of review—and six figures in attorney fees.

Problem Statement

Tasked with reviewing nearly 15,000 voicemail records prior to production, the company's legal department estimated the project would require nearly 600 hours of review—and six figures in attorney fees.

To power through the audio files alone would take nearly 60 hours. The associates at their outside firm conducted the review at an average rate of \$300 an hour. This led to an additional \$178,356 in review costs. Even with contract reviewers operating at a highly reduced rate, review would cost over \$25,000. Transcribing documents with a third party service would have run up another \$37,000, assuming two minutes of audio per voicemail and a transcription rate of \$1.25 per minute.

Key Challenges

- Review thousands of voicemails with limited time and budget

How Challenges Were Addressed

With VoiceTouch, Logikcull automatically transcribes the contents of a media file (ex. voicemail, dashcam footage, or a Zoom recording), indexes the text, and makes it available for search. Logikcull users can then use keyword searches, Culling Intelligence, and intuitive filters to quickly cull out the documents that don't matter and focus in on those that do. What's more, with VoiceTouch, users can click on any word or passage in the transcript and automatically jump to the corresponding point in the A/V file to speed review.

The ROI Results of Using Logikcull

With VoiceTouch, the in-house team was able to quickly transcribe and index all of their voicemails. Using a simple keyword search and Logikcull's Culling Intelligence, VoiceTouch is also able to identify the recordings that were potentially responsive to the request.

In under 10 minutes, the legal team had narrowed their review set down from over 14,000 records to just eight—eliminating more than \$178,000 in potential review costs instantly.
